PhD student at Nantes University since March 2026, within the Laboratoire des Sciences du Numérique de Nantes (LS2N). My research focuses on efficient and frugal methods for the automatic extraction and structuring of cultural event information, in order to connect cultural and creative industries with their audiences.

Education

Nantes University – LS2N (TALN team) & LIA Nantes, France
PhD in Computer Science (MaSTIC Doctoral School) *Mar. 2026–Present*
Automatic extraction and structuring of cultural events: an efficient and frugal approach to connect cultural and creative industries with their audiences

- Supervisors: Richard Dufour (LS2N, Nantes University) and Vincent Labatut (LIA, Avignon University)
- Industrial partner: ideactiv (French cultural indexing platform)
- Detecting event listings on cultural websites, identifying individual events, extracting and consolidating their information (title, date, venue, price, booking, etc.) without hallucinations or costly third-party services

Nantes University Nantes, France
Master ATAL (Machine Learning and Natural Language Processing) *2023–2025*
Specialization in advanced NLP techniques and machine learning

University of Strasbourg Strasbourg, France
Bachelor's Degree in Computer Science (L3) *2022–2023*
Advanced study in algorithms and programming

Cheikh Anta Diop University of Dakar Dakar, Senegal
Bachelor's Degree in Mathematics and Computer Science *2018–2022*
Fundamentals of mathematics and computer science

Professional Experience

Ouest-France Rennes, France
Assistant Data Scientist – Research & Development (work-study) *Sept. 2024–Sept. 2025*

- Geotagging: identifying location references from address fragments in news articles, and linking them to place tags
- Knowledge extraction: named entity recognition and entity relation mapping
- Disambiguation of geographical entities (addresses, squares, monuments, cities, etc.)

Laboratoire des Sciences du Numérique de Nantes (LS2N) Nantes, France
Research Intern *Jan. 2024–May 2024*

- Comparison of named entity recognition systems on press articles
- Machine learning for key information extraction
- Annotation and analysis of structured and unstructured data

Academic Projects

Nantes University Nantes, France
DEFT2013 Challenge – Recipe classification *Feb. 2024–Mar. 2024*

- Classification models for recipes (main course, starter, dessert) based on titles and instructions, using NLP and machine learning methods

University of Strasbourg Strasbourg, France
Autoencoders and classification *Apr. 2023–May 2023*

- Evaluation of autoencoders for tabular data classification
- Comparative analysis of performance with and without compression into a reduced latent space

Technical Skills

Machine & Deep Learning	PyTorch, Scikit-learn, LLMs, Fine-tuning, Quantization, Distillation
NLP	spaCy, NLTK, LangChain, RAG, Agents, Named Entity Recognition
Programming	Python, R, Java, C/C++
Databases	SQL, MySQL, Oracle, PostgreSQL, MongoDB

Languages

Wolof: native • **French**: fluent • **English**: B2

Interests

Reading: newspapers, tech news, technology watch • **Sport**: football
